Total Height From Above Ground:	40"
Bags:	One box, 50 count, included
Space Between Ground and Valet:	10"
Hole:	<ul style="list-style-type: none">• 12.0"d x 7.0"w• Fill with 40 lbs."ready to use" cement
Total Ship Weight:	42 lbs

1. Select a good spot in your community or park where you want to install the **Aluminum Dog Valet**.
2. Dig a 7" diameter hole, approximately 12" deep into the soft ground. Insert the aluminum mounting pillar up to marker line approximately 12" into the hole filled with a 40 lb. bag of "ready to use concrete mix". **The mounting plate should be approximately 10½" above the ground.** Level the post in a straight vertical position and let concrete dry for at least 12 hours.
3. After concrete is dry, the mounting pillar should be sturdy and safe for installation. Slide the **Aluminum Dog Valet** over the pillar, matching the holes in the mounting plate with the holes in the **Dog Valet** body plate. Secure the **Dog Valet** with the two (2) 5/16" bolts and lock washers using a ½" wrench.
4. Insert one of the enclosed **Liner Bags** into the container body (fold over the upper edge of the container.)
5. To replace the rolls of **Dog waste Bags**, pull out the empty box, remove the diamond shaped perforated tab from a new bag/roll box and push box in place on the lid shelf. The lid dispenser opening should match the box opening and the lettering on the box should not be upside down. Be sure the bags will be dispensed following the upper wall of the dispenser opening (see Illustrations A and B) to ensure maximum tension when tearing off bags. **The Aluminum Dog Valet printing on the litter pick up bags will be visible when hanging out of the dispenser slots.** Close the lid and pull the first bag out by finding the raw edge of the first bag through the dispenser opening.

7. ENJOY WATCHING PET OWNERS PICK UP AFTER THEIR DOGS!
