1. Select a good visible spot in your community or park where you want to install the Aluminum **Pet Waste Bag Dispenser**, such as on a post, building wall, tree, fence post, street sign post, etc. The recommended installation height of the Aluminum **Pet Waste Bag Dispenser** is 60" (5').
2. Remove the two keys from the back of the Dispenser. Insert key into the universal cam lock on the bottom access panel and turn one quarter to the right or left. Carefully, pull the lower part of the front access panel approximately 2" towards you and lift to release and separate the front access panel from the body of the Dispenser.
3. The Dispenser has two pre-drilled holes through the back wall. These two holes and the mounting hardware included match with the holes of every standard channel or square telescopic mounting post.
4. Take Aluminum **Pet Waste Bag Holder** using one 2½" bolt, place bolt through holder and Dispenser body top hole, attach to post with 1 washer, 1 nylon insert locknut, and tighten. Use remaining bolt, washers and locknut for bottom hole for mounting to a standard channel type or square telescopic post.
5. Hang four (4) **Pet Waste Bags** (100 count each per pack), with the logo facing front. Install the front access panel, lock it with the cam lock key. Reach in slot, pull out bag, and use to pick up dog waste. Refill with **Pet Waste Bags** as needed.
6. **ENJOY WATCHING PET OWNERS PICK UP AFTER THEIR DOGS!**
