Step 2:
Lift and Twist to
release base
From top

Figure 2

How To Empty:

1. Using the supplied hex key, remove screw holding cap to the main unit.
See Figure 1
2. To remove the cylinder from the cap, slightly lift, twist and lower to disengage. The unique "J" channel keeps cylinder attached to cap once screw is removed.
See Figure 2
3. Make sure there are no smoldering cigarette butts before discarding.
4. To reattach the unit, slide cylinder up, twist and lower.
5. Secure screw back in place.

Cleaning and Maintenance

- To minimize tar buildup and odor inside the cylinder, clean the unit periodically with a household degreaser or cleaner.
- Empty the unit based on actual usage; units in high-traffic areas must be cleaned more frequently.

Warning

Cylinder must be emptied to avoid fire hazard.

Contents:

(1) Leafview Cigarette Receptacle, (1) Hex Key, (1) Wall Mount Bracket, (2) Nuts

*Each part is important to the safe and effective use of this product.
Contact us immediately if any items are missing.*

Option 1: Mount to a Wall

1. Remove the wall mount bracket from the back of the cigarette receptacle.
2. Hold the wall mount bracket in the desired location (check with your local ordinance of ADA compliance requirements) on the wall and mark the top hole.
3. Use appropriate hardware for your substrate. Drill and attach the unit bracket through the top hole. Mark the bottom hole, drill and attach. (Mounting hardware is not included.) **See Figure 1.**
4. Align the welded studs on the cigarette receptacle with the bracket holes.
5. Attach the receptacle to the bracket with the two supplied nuts. Tighten to a snug fit, but do not over-tighten, as too much force can break the screws. See **Figure 1.**

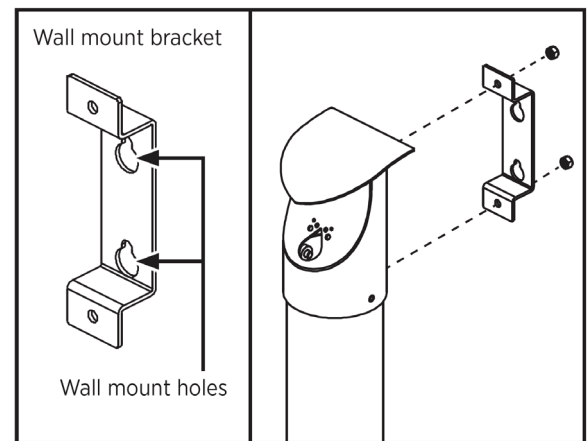

Figure 1

Option 2: Mount to a Waste Container

1. Remove the wall mount bracket from the back of the cigarette receptacle. The recommended location for the cigarette receptacle is to the left of the waste container side door. **See Figure 2.**
2. To attach cigarette receptacle to the waste container, measure down 4" and center from the top of the waste container and drill a 3/16" hole. **See Figure 2.**
3. Using the bracket, line up the top hole of bracket with drilled hole and mark bottom hole, centered left to right. Drill the second 3/16" hole.
4. Align and place the welded studs in cigarette receptacle through the holes drilled in steps 3 and 4. **See Figure 3.**
5. Place the bracket over the studs on the inside of the waste container. **See Figure 3.**
6. Apply nuts (included) to the thread protruding inside of the waste container.
7. Tighten to a snug fit, but do not over-tighten, as too much force can break the studs.
