

DOWNSPOUT SPLASH BLOCK :: DSSB-36

Splashblocks from TPC are designed to prevent intense rainfall from gutters or roofs from damaging the ground below. The splashblocks instead absorb the impact, preserving the pavement or foundation below. Made of recycled tire rubber, the splashblocks are environmentally friendly and designed to withstand extreme weather conditions without breaking down or falling apart. Ideal for homes or commercial properties, TPC's splashblocks are the best solution for your gutter or roofing drainage issues.
