

Recycled Rubber Garage Stop

Model #: 400-1016

Garage stops are ideal for preventing vehicles from pulling too far into the garage and causing damage to the vehicle or building. The garage stops are made of recycled tire rubber, making them an environmentally friendly option. Additionally, the garage stops can withstand extreme temperatures and weather conditions, meaning it will not crack or erode due to water or salt from winter roads. The garage stop features yellow safety stripes, to alert drivers in poor lighting conditions. Garage stops are a great addition to any home to protect your vehicles.
