

Ubrace Specifications - 358-1001 & 358-1002

Applications

358-1001 (Ubrace-1): Used for tables that weigh 70 or more pounds (IE. Picnic tables) that have a hole in the tabletop and a centering device under the tabletop to be secured to an umbrella pole. The collar is secured on the pole under the tabletop. The weight and size of table secure the system. The unit requires a full 1.50" diameter umbrella pole.

358-1002 (Brace-2): Used 2 collars for tables that weigh 40 to 70 pounds (IE. Patio Tables). These tables are designed to accommodate an umbrella, has a hole in the tabletop and a centering device under the table. Two collars, one secured above the tabletop and one below the centering device, "sandwich the table between the collars on the umbrellas pole". The weight and size of table secures the system. The unit requires a full 1.50" diameter umbrella pole.
