

VERTICAL RACK

When floor space is at a premium, the Vertical Rack provides an efficient and highly configurable parking system to maximize your capacity. Adjustable Bike Trac mounts, allow multiple bike spacing options and the Tracs will accommodate narrower road wheels, all the way up to full size fat tires so every bike has a secure space to park.

Product Specifications

- Adjustable mounting system for Bike Tracs allows multiple spacing options ranging from 15" - 24"
- Pivoting lock bar allows optimized locking position on all bikes and is shaped to prevent theft by use of a pipe cutter
- Full length bike tracs provide support for both front and rear wheels for greater stability and accommodate up to 5" wide tires
- Tracs can be staggered in height to limit handlebar interference between bikes
- Available in single- and double-sided configurations with locking or non-locking options
